TITLE	University of Massachusetts Amherst Factbook, 1996-1998.
INSTITUTION	Massachusetts Univ., Amherst. Office of Institutional Research.
PUB DATE	1998-00-00
NOTE	91p.
AVAILABLE FROM	Univ. of Massachusetts Amherst, Office of Institutional Research, 237 Whitmore, Amherst, MA 01003. Tel: 413-545-0941; e-mail: oir@oirp.umass.edu.
PUB TYPE	Numerical/Quantitative Data (110) -- Reports - Descriptive (141)
EDRS PRICE	MF01/PC04 Plus Postage.
DESCRIPTORS	Higher Education; *Institutional Characteristics; School Demography; *School Statistics; State Universities; Tables (Data)
IDENTIFIERS	*University of Massachusetts Amherst

ABSTRACT

This factbook is a retrospective of the University of Massachusetts Amherst from 1996 through 1998 and includes many data tables and figures. It provides answers to many of the most commonly asked questions about the campus and serves as a source of comparative information over time. Detailed information is provided in the following categories: organization, admissions, enrollment, student statistics, degrees, faculty and staff, finances, and miscellaneous. (EV)

Reproductions supplied by EDRS are the best that can be made

The 1996-98 *Factbook* represents a continuing effort to improve the quality and accessibility of information about the University of Massachusetts Amherst. It is a retrospective of the campus through the 1996-98 academic year in the form of data, information, tables and figures. Information about the campus's organizational, governance and academic structures are the most recent available.

The *Factbook* provides answers to many of the most commonly asked questions about the campus and serves as a source of comparative information over time. OIR recognizes that many questions about the campus cannot be answered in the *Factbook*. Answers to such questions may be available from OIR in other publications and reports, or through specialized research, drawing on many sources of institutional data and information. Help in finding answers about the campus is always available from OIR and users with specific information needs or requests for more up-to-date information are encouraged to call or visit our web site.

Comments on the *Factbook* and ways in which it might be improved are always welcome. Appreciation is extended to the many offices and individuals who contributed to the 1996-98 *Factbook*.

Nora C. Groves
Assistant Director of Analytical Studies

Selected tables from the *Factbook* and *Factbook* updates are available on the World Wide Web at

The University of Massachusetts

History

The University of Massachusetts Amherst was established in 1863 under the original Morrill Land Grant Act. The campus is the oldest and largest in the state university system.

Four faculty members and four wooden buildings awaited the first entering class of 56 students at the Massachusetts Agricultural College in 1867. The first graduate degrees were authorized in 1892. "Mass Aggie" became Massachusetts State College in 1931, and the University of Massachusetts in 1947.

Two legislative breakthroughs were responsible in part for the University's progress over the past three decades: the 1956 "Freedom Bill," giving the University authority to appoint faculty members at any salary within the rank's established range, and the 1962 "Fiscal Autonomy Bill," transferring from the Legislature to the Trustees full control–within budget and salary scale limits–over professional personnel actions and many purchasing procedures.

Since World War II, the University experienced rapid growth in its physical facilities, enrollment, and quality of programs. The physical growth, crested in the decade of the '70s, the beginning of a fairly stable enrollment plateau that continued until budget cuts and tuition increases triggered enrollment declines in the early '90s.

The University's second campus was opened in Boston in 1965 and expanded to the Harbor Campus in 1974. A third campus, the University of Massachusetts Medical Center at Worcester, was founded in 1962 and enrolled its first class in 1970. The same year, the President's Office was moved from Amherst to separate offices in Boston, and the office of Chancellor was established as the primary administrative position at each campus.

In 1989, the Board of Trustees commissioned a blue-ribbon panel to examine "...the future role of the University of Massachusetts in the Commonwealth, its governance and financing." The Commission on the Future of the University (better known as the "Saxon" Commission, after its chair, MIT Corporation Chairman and President Emeritus of the University of California David S. Saxon) called for the consolidation of all five public university campuses (the three UMass campuses, the University of Lowell, and Southeastern Massachusetts University) into a single university sector with an autonomous governing board. In 1991, Governor William F. Weld signed legislation implementing much of the Saxon Commission's report and creating a new five-campus University of Massachusetts with a single president and Board of Trustees.

The University Today

The University is governed by a Board of Trustees with 19 voting members, and with 18 members who are appointed by the Governor. The students of each of the five campuses elect a student trustee, and two of these five serve as voting members of the Board on a rotating basis. Governance responsibility in some areas (e.g., tuition rates, academic program review and approval) is shared with the statewide Board of Higher Education. Board policy is administered by the president and the five campus chancellors.

Amherst Campus Vision Statement

The vision of the Amherst campus reflects the University's mission in the following ways:

As the system's flagship campus, Amherst draws students from throughout the Commonwealth, the nation and the world, providing a broad undergraduate curriculum with nearly 100 majors and approximately 70 master's and 50 doctoral programs. It will continue as a Carnegie Research I university and maintain its presence in Division I intercollegiate sports; it will continue its efforts to achieve a median ranking among the American Association of Research Libraries and obtain membership in the American Association of Universities.

- **Access.** Providing undergraduate education for all qualified students (meeting their full financial need) in a broad range of areas found in leading public Research I universities, as well as in graduate programs leading to doctoral or other appropriate terminal degrees in most of these fields.

- **Excellence.** Maintaining a range of academic offerings comparable in quality to those offered at AAU universities; maintaining national leadership in such areas as creative writing, computer science, engineering, polymer science, linguistics, astronomy, sports management, and hotel management; and striving for national leadership in other academic areas.

- **Innovation.** Creating new knowledge with a broad program of distinctive research; and disseminating this knowledge through publications, public presentations, and professional conferences.

- **Economic Development and Global Competitiveness.** Supporting the economic development of the Commonwealth by providing assistance to small business and industry; encouraging technology transfer; undertaking research in areas of economic importance; and providing the language instruction and other tools necessary for participation in the global economy.

- **Public Service.** Providing public service by meeting formal land-grant responsibilities; serving agriculture; offering assistance to regional cities and towns; and engaging in research and outreach in such areas as public health, environmental safety, transportation, public finance, and education.

- **Quality of Life.** Developing the human and cultural quality of life for the region through a comprehensive arts program; assisting the public social agencies to provide improved services to the citizens of the Commonwealth; and promoting the multicultural awareness and tolerance of diversity essential to a pluralistic, transnational society.

Five College Cooperation

Five College cooperation is based on the principle that sharing information and resources helps each member institution – Amherst, Hampshire, Mount Holyoke and Smith Colleges, and the University of Massachusetts Amherst – to offer the best possible education. Fundamental to that principle is the Five College interchange, which enables students to take courses for credit on any of the campuses at no additional charge. A fare-free bus service connecting the campuses provides easy access for courses as well as cultural and social activities, and a new Five College online course catalog offers current information about courses and faculty. Open library borrowing, aided by an automated Five College bibliographic search, gives faculty and students access to well over 8,000,000 print resources within the five main collections combined.

Cooperation within a number of disciplines makes possible shared academic departments and programs. In addition to the two Five College departments of Astronomy and Dance there are joint programs, which build on the faculty and curricular resources at the five campuses.

Five College Certificate Programs enable students to pursue a structured concentration in African Studies, Latin American Studies, or International Relations certificates. Pending certificates include Middle East Studies and Culture, Health, and Science.

- Coordination of course offerings in East Asian Languages ensures that students have access to beginning and advanced levels of study in Japanese and Chinese and to beginning and intermediate Korean.
- A Five College Self Instructional Language Program offers guided instruction in some eleven languages less commonly taught at the undergraduate level.
- Opportunities for undergraduate field research are greatly expanded through a joint program in Geology and an active Five College program in Coastal and Marine Sciences.
- The music departments mount joint concerts of the many choral groups and of new music by members of the faculty. They also host annually a distinguished composer or musicologist and support a Five College Early Music Program.
- A Five College Program in Peace and World Security Studies (PAWSS) sponsors many forums for discussion of global concerns with government officials and international scholars.

Other forms of academic cooperation include various forms of faculty exchange and Five College faculty seminars, both of which bring faculty together over curricular and scholarly interests. A new UMass/Five College Graduate Program in History, for example, formalizes faculty exchanges between the University's department and those of the four liberal arts colleges, providing a course of study uniquely rich in range and diversity for undergraduates and graduate students alike.

Five College Joint Faculty Appointments enable the institutions to explore new areas of study by sharing scholars who come to teach specialized courses at all five campuses over a period of two or three years.

Other cooperatively funded activities include the public broadcasting station WFCR (Five College Radio at 88.5 FM); and The Massachusetts Review, a quarterly review of literature, arts, and public affairs. A new online Five College Calendar of Events complements the monthly printed calendar that announces many campus events. Other publications available from Five Colleges include: a student guide, an annual Five College Faculty Handbook, and a Five College magazine, INK, published fall and spring. For further information, contact the Five College center (413-256-8316) or consult the Five College homepage on the World Wide Web (http://www.fivecolleges.edu).

UMass Extension

The mission of UMass Extension is to serve the public good through the creation, communication and application of knowledge. As a major outreach unit of the Amherst campus, UMass Extension acts as the *working partner* or link between the university research community and the citizens, communities and businesses of the Commonwealth. UMass Extension educators are faculty and staff of the College of Food and Natural Resources, and the School of Public Health and Health Sciences. Many hold joint appointments in research and resident instruction as well. Faculty and staff are located on the Amherst campus and in Extension centers and project offices around the state.

The goals of UMass Extension are to enhance economic development and environmental quality, and to assist people and communities in the Commonwealth in reaching their full potential. Through the efforts of approximately 100 professional educators and 5,700 adult volunteers working throughout the Commonwealth, UMass Extension directly impacts over 30,000 Massachusetts adults and more than 60,000 youth each year. In addition, thousands of citizens attend regional conferences, subscribe to news letters, obtain written publications and access the UMass Extension Web page for educational information critical to their lives and livelihoods.

Currently there are four major program areas:

- **The Agroecology Program** develops and applies new agricultural technologies and practices for the purpose of maintaining agricultural sustainability, while improving environmental health and safety, and building supportive communities. A new term, agroecology describes the study of agricultural ecosystems and the ecological principles that govern relationships within communities and the environment, including the first principle of ecology, that all things are interconnected.
- **The 4-H Youth and Family Development Program** focuses on educational programs designed to empower individuals and help communities meet their goals. Emphasis is on enhancing the employment potential of individuals, life skills education, leadership development, and diminishing the fre-quency of risk taking behaviors such as teen pregnancy and substance abuse.
- **The Natural Resources and Environmental Conservation Program** addresses community, state and regional environmental issues related to resource utilization, conservation, and protection. The program works with local officials and community leaders, environmental and conservation organizations, state, regional, and federal agencies, and K12 educators providing technical information, capacity building, training and education.
- **The Nutrition Education Program** centers on nutrition and food safety knowledge for low income families, especially those with young children, high risk youths and elders, and agency staff who work with them. The program's mission is to provide individuals, families, and communities with the knowledge and skills that empower them to make informed choices about healthy diets, reduce risks of food-borne illness and chronic disease, and efficiently manage food resources that support their physiological health, economic, and social well-being.

Public Health and Health Sciences	393	308	0	308	110	0	110
University, Pre-Majors	1,933	1,432	1	1,433	416	0	416
University, Undeclared	6,484	4,354	11	4,365	1,174	5	1,179
Total	**18,006**	**12,440**	**706**	**13,146**	**3,512**	**225**	**3,737**

Note A. Some academic units have restricted the number of entering students, and many applicants are offered an alternate major. In the majority of cases, the alternate acceptance and enrollment figures do not represent acceptance or enrollment into that school or college, but acceptance or enrollment as an "Undeclared" Major.
Note B. Data are based on the current organizational structure of academic units and departments. Therefore, school or college totals may not be directly comparable to previous semesters and/or years due to the consolidation, reassignment, or suspension of selected academic programs.

Note A. Includes applications, acceptances, and enrollments in graduate programs administered by the Division of Continuing Education.
Note B. Graduate admissions include data for both summer and fall.
Note C. Data are based on the current organizational structure of academic units and departments. Therefore, school or college totals may not be directly comparable to previous semesters and/or years due to the consolidation, reassignment, or suspension of selected academic programs.

*Number of students for whom these data were available.

Note A. Effective Fall 1996, the College Board began reporting SAT scores on a new set of scales based on a larger, more diversified reference group from the 1990's. Recentering reestablishes both the average verbal and math scores near 500, the midpoint of the 200 to 800 scoring scale. This allows verbal and math scores to be compared directly as a measure of the two kinds of skills.
Note B. 25th - 75th percentile represents the range of scores for the middle 50% of students.
Note C. Effective Fall 1997 High School GPA is a weighted average (Honors and Advanced Placement courses are given extra credit), and therefore is not comparable to previous years.
Note D. The numbers pertain to students who were processed through the Office of Undergraduate Admissions, submitted SAT scores, and were enrolled in a credit-bearing course at the end of the 14th calendar day of the semester. Students are categorized according to the school or college affiliation of the major into which they were accepted.
Note E. Beginning Fall 1992, SAT data exclude special admits and are not comparable to earlier years.

*Number of students for whom these data were available.

‡SAT scores and high school ranks are not presented in cells with less than four entries.

Note A. Effective Fall 1996, the College Board began reporting SAT scores on a new set of scales based on a larger, more diversified reference group from the 1990's. Recentering reestablishes both the average verbal and math scores near 500, the midpoint of the 200 to 800 scoring scale. This allows verbal and math scores to be compared directly as a measure of the two kinds of skills.

Note B. 25th - 75th percentile represents the range of scores for the middle 50% of students.

Note C. The numbers pertain to students who were processed through the Office of Undergraduate Admissions, submitted SAT scores, and were enrolled in a credit-bearing course at the end of the 14th calendar day of the semester. Students are categorized according to the school or college affiliation of the major into which they were accepted.

Note D. Beginning Fall 1992, SAT data exclude special admits and are not comparable to earlier years.

Note E. Data are based on the current organizational structure of academic units and departments. Therefore, school or college totals may not be directly comparable to previous semesters and/or years due to the consolidation, reassignment, or suspension of selected academic programs.

Enrollment

Enrollment Definitions

Headcount Student Major is the actual count of individual students who have selected a given major. Every student is assigned a "major," even though it may be only an administrative classification (e.g., "non-degree" or "undeclared").

At the undergraduate level, the count of student majors includes students' declared primary and secondary majors. In the case of multiple majors, the enrollment is attributed to both departments. For example, if a student declares a primary major in Journalism and a secondary major in Political Science, both departments in their respective colleges receive credit for the enrollment. In Fall 1997, there were 981 students with more than one major.

Full-Time Equivalent (FTE) Student Majors show how many headcount students there would be if all students took a "full" credit load (15 credits for undergraduates; 9 for graduate students, effective Spring 1992). We look at the credits generated by students within each major regardless of where the courses are offered and then divide by 15 or 9, as appropriate. For undergraduate FTE student majors, the number of credits are distributed based on the number of declared majors. As in the previous example, half of the student's total credits would be assigned to Journalism, and half would be assigned to Political Science. Prior to Fall 1995, all credits were attributed to Journalism.

FTE Instructed Students is a measure of instruction offered and consumed, regardless of the majors of the students taught. We look at the credits generated in the courses *offered by* each discipline, calculate full-time equivalency, and then distribute instruction according to "majors " and "non-majors." FTE instructed "majors" are defined as students with **any** declared major within the department or program offering the course; instructional credits for "majors" are assigned when the student taking the course is also a major in the department offering the course. All other students, including those without a declared major or pre-majors, are defined as "non-majors." In the case of the student with majors in Journalism and Political Science, FTEs generated in Journalism and Political Science would be classified as instruction to **majors** in the respective departments. Previously, only Journalism would have been credited with instruction in the major.

Unlike FTE Student Majors, calculation of FTE Instructed Students depends on the level of the course being taken and the level of the student taking the course. For undergraduate courses (those numbered 100-499) we always divide by 15, whether the student is undergraduate or graduate. Similarly, for graduate courses (those numbered 600-899) we always divide by 9. For courses numbered 500-599, however, we look to see what kind of student is taking the course: if undergraduate, we divide by 15; if graduate, we divide by 9.

Data Comparability

Enrollment data presented in the *Factbook* are based on the current organizational structure of academic units and departments. During the course of any given semester, organizational, departmental or programmatic changes may occur. Therefore, school or college totals may not be directly comparable to previous semesters due to the consolidation, reassignment, or suspension of selected academic programs. In many cases, these changes (e.g., program name change, addition or consolidation of undergraduate majors) do not affect the numbers at the school or college level. In addition, enrollment numbers are not directly comparable to previous semesters due to the inclusion of students with multiple majors.

The following organizational or programmatic changes are in effect for academic years 1996-97 and 1997-98:

- The Department of French and Italian in the College of Humanities and Fine Arts has been renamed French and Italian Studies. The French major has been renamed French and Francophone Studies.
- Programs and courses previously offered in the Department of Slavic Languages and Literature in the College of Humanities and Fine Arts have been replaced by the interdisciplinary program of Slavic and Eastern European Studies. Soviet and Eastern European Studies, the major, has been renamed Russian and East European Studies, and the program has moved to the College of Social and Behavioral Sciences.
- The master's program in Public Policy, formerly affiliated with the Department of Political Sciences, has been reorganized and renamed. The program in Public Policy and Administration reports to the Dean of the College of Social and Behavioral Sciences.
- The Department of Plant Pathology in the College of Food and Natural Resources has been consolidated with the Department of Microbiology.
- The interdisciplinary program in Organismic and Evolutionary Biology is included with the College of Food and Natural Resources.

*Other: Includes Post-Graduates (students formally pursuing a second baccalaureate degree), Non-Classified (part-time matriculating), and Special (part-time non-matriculating) students.

†Master's level includes 65 female and 19 male Certificate of Advanced Graduate Studies (C.A.G.S.) students.

‡Includes Stockbridge students as follows: First-Year - 33 females, 138 males; Second-Year - 22 females, 105 males; Special -3 female, 4 males.

**Graduate totals include 1,056 Non-Degree students.

Note A. **Student Major**: A student with a declared major within the school or college. For undergraduate "Total" at the school or college level, the duplicated count of student majors (primary and secondary) is reported. At the campus level, this is an unduplicated count. Therefore, the sum of school and college totals does not equal "Total" counts.

Note B. At the Undergraduate level, "Other" school/college category includes pre-majors and students with a major of "Undeclared."

Note C. Data are based on the current organizational structure of academic units and departments. Therefore, school or college totals may not be directly comparable to previous semesters and/or years due to the consolidation, reassignment, or suspension of selected academic programs.

Note D. See Enrollment Definitions for additional detail.

Division of Continuing Education

The Division of Continuing Education provides access to the academic resources of the University to those people of the Commonwealth who are not full-time students, to local and national business firms throughout the state, and to the general community. An administrative arm of Academic Affairs, the Division works closely with the various academic units in planning and offering credit and non-credit programs to meet the need of non-traditional students. In Fall 1997, there were 1,050 undergraduate students enrolled in the Division's credit-bearing courses on the Amherst campus. The Division organizes and administers evening courses, Winter and Summer Sessions, and response courses.

In addition, the Division offers Adventures in Lifelong Learning workshops, cultural trips and tours, educational opportunities for professional development, and programs in areas such as fine arts, social sciences, health sciences, food and natural resources, real estate, natural sciences and mathematics, and computers.

The Division offers a Bachelor of General Studies degree with individual concentration and a post-baccalaureate teacher certificate program as well as part-time master's degrees and certificate programs. Ongoing Division programs include the Arts Extension Service, which helps develop self-sufficient community-based arts programs and provides services for individual artists and artist groups. The University of Massachusetts Family Business Center assists family businesses in recognizing their common problems and in finding solutions to the unique challenges they face. The Center offers members a series of educational forums led by experts in the field of family business consulting. Academic advisors are available to help students with degree programs or courses related to their life and career objectives.

Full-Time Equivalent (FTE) Instructed Students Generated by Division of Continuing Education Students by School or College Fall 1996 and Fall 1997

Note A. **Regional**: Students who are legal residents of the other New England states and enrolled in a degree program at the University of Massachusetts Amherst that is not offered at the students' own state institutions. Effective Spring 1990, New England Regional Students are assessed tuition at 50 percent above that of Massachusetts residents.
Note B. **International**: Students holding a visa are given the "international" designation and pay out-of-state tuition. Those students with refugee or alien registration status are classified as in-state or out-of-state depending on their state of residence.
Note C. **Exchange**: Students who are full-time undergraduate students from other colleges and universitites on exchange at University of Massachusetts Amherst through one of several national and international exchange programs. Each program has a different tuition payment agreement.
Note D. **Off-Campus**: Graduate students enrolled in non-state supported programs administered by the Division of Continuing Education pay the same tuition regardless of residency.
Note E. Individual percentage entries may not sum to 100.0 because of rounding.

*Tuition and Fees shown are for full-time students. Room reflects the average rate. Board rates are for the 14-meal plan.
†Percent increase from previous year.
‡Actual cost for fall and spring semesters combined (includes fee increases adopted mid-year and applied to spring semester only).

Note A. Effective January 1990, New England Regional students are assessed tuition at 50 percent above that for Massachusetts residents.
Note B. Figures do not include additional mandatory fee for Engineering students (effective Fall 1985).
Note C. Effective 1989-90, room rates include telephone fee.
Note D. Effective 1993-94, instructional lab fees were incorporated in mandatory fees for undergraduate students.
Note E. Effective Fall 1998, mandatory fees for **out-of-state** undergraduate and graduate students were increased to $3,432 and $3,204, respectively.

*Certain specialized degree programs (i.e., Astronomy and Dance) are operated jointly by the Five Colleges.

†Graduate students are encouraged to major in the interdisciplinary major, Molecular and Cellular Biology.

‡The School of Education offers the Certificate of Advanced Graduate Study (CAGS) in Education.

††Suspended: not included in total.

** Includes six active Associate's degree programs offered by the Stockbridge School of Agriculture.

‡‡The Ph.D. program is offered jointly with the University of Massachusetts Medical School.

Note A. Reflects current organizational structure of academic programs.

Note B. Effective August, 1998.

*Minor programs allow the student to explore and attain some competence in a second area of study without fulfilling the full range of requirements of the major. At least 15 credits in a coherent set of courses in a particular discipline, department or program are required.

Note A. Reflects current organizational structure of academic programs.
Note B. Minor programs are not offered by the College of Engineering and the Schools of Education and Management.
Note C. Effective August, 1998.

Note A. Effective 1983-84, Certificates of Advanced Graduate Study (C.A.G.S.) have been included with Master's degrees; previously, C.A.G.S. were reported with Doctorate degrees.
Note B. Associate's degrees were first awarded in 1963; Master's degrees were first awarded in 1894; Doctorate degrees were first awarded in 1902.
Note C. Effective 1985-86, the Bachelor of General Studies degree awarded through the Division of Continuing Education is included with baccalaureate degrees.
Note D. Bachelor's data include double degrees, but do not include double majors. During academic year 1997-98, 60 double degrees were awarded.

*Effective Fall 1995, the Department of Industrial Engineering merged with the Department of Mechanical Engineering.
†Effective Fall 1995, the Department of Microbiology moved from the College of Natural Sciences and Mathematics to the College of Food and Natural Resources.
‡Effective Spring 1996, the Department of Plant Pathology moved to the Department of Microbiology.
‡‡Effective Fall 1997, the Department of Soviet and East European Studies and Slavic Languages and Literature have moved to the College of Social and Behavioral Sciences and merged to form the program of Slavic and Eastern European Studies.

Note A. **Other**: The School of Education offers the Certificate of Advanced Graduate Study (C.A.G.S.). The College of Food and Natural Resources offers the Associate of Science (A.S.) degree.
Note B. Data are based on the current organizational structure of academic units and departments. Therefore, school or college totals may not be directly comparable to previous years due to the consolidation, reassignment, or suspension of selected academic programs.
Note C. During academic years 1996-97 and 1997-98, 58 and 60 double degrees were awarded, respectively.

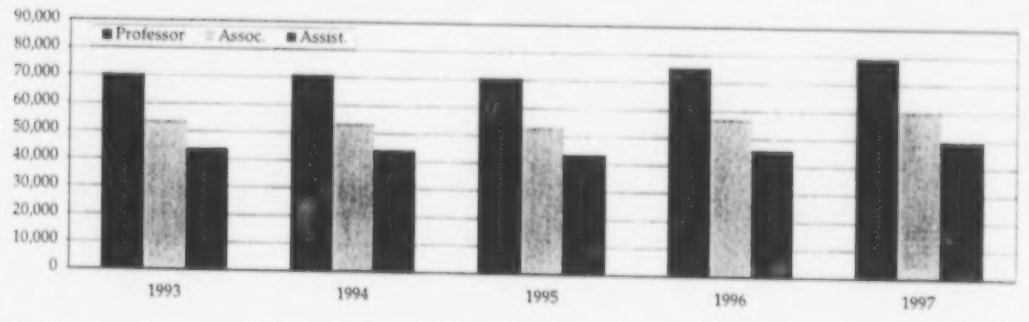
Average Salary of Full-Time Instructional Faculty
by Academic Rank
Fall 1993-Fall 1997



*Salary includes cost of living, but not merit increases awarded.
†Does not include 6% cost-of-living increase.
‡Salaries are not presented in cells with only one entry but are included in the totals.
**Does not include 2.5% cost-of-living increase.

Note A. **Instructional Faculty**: Faculty whose primary responsibility is instruction; includes department heads and faculty who are on sabbatical or have release time for research; excludes faculty on leave without pay.
Note B. Twelve-month (calendar year) salaries were scaled to a nine-month (academic year) basis using a conversion factor of .818.

Note A. Indices are shown with 1982-83 as the base year (FY83=100). To set another year as the base, divide all index values by the value shown in the table for the new base year.
Note B. **HEPI**: Higher Education Price Index - measures effects of inflation on current educational and general operations excluding sponsored research sales and service of education departments and auxilliary enterprises.
Note C. **CPI**: Consumer Price Index - measures effect of inflation on fixed market basket of goods and services that people buy for day-to-day living.
Note D. **R&DPI**: Research and Development Price Index - measures effect of inflation on current direct expenditures by universities for sponsored research.
Note E. **Library**: Academic Library Price Index - measures effect of inflation on current operation budgets of college and university libraries.
Note F. **Construction**: Boechk Construction Index - measures the effect of inflation on new construction.
Note G. **Equipment**: Capital Equipment Price Index - measures the relative price level of depreciated movable property.
